Editorial

The WiCi Concept® line for combined WC / wash basin units and wash basin kits for existing water closets, was put on the market by Atelier Création JF in 2010.

We gave the highest priority to quality, functionality, appeal and comfort in the design and manufacture of our products.

Our cleverly designed wash basins with toilet and wash basin kits can be fitted to any sanitary configuration, offering many advantages to users:

- Maximum space economy
- Original design, practical and hygienic
- Water savings (500 to 2000 litres per annum / person)
- All-inclusive kits ready to be installed.
- Customized configurations, if required
- French design and manufacture

Whether your project involves a new building, renovation or an improvement to an existing installation, WiCi Concept® products are especially intended for:

- Private accommodation (flats and houses)
- Private practices with waiting rooms
- Cafés, hotels, restaurants, B & Bs, ...
- Offices, public services, exhibition halls, ...

To become familiar with WiCi Concept® solutions, see the various photos of installations on our Website:

WiCi Concept Hand basin kit for existing water closets

How to check whether the WiCi Concept wash basin unit can be fitted on your WC?

A- Dimensions:

Measure the length and width of the cistern (excluding lid) and refer to the compatibility chart below.

B- Position of the seat:

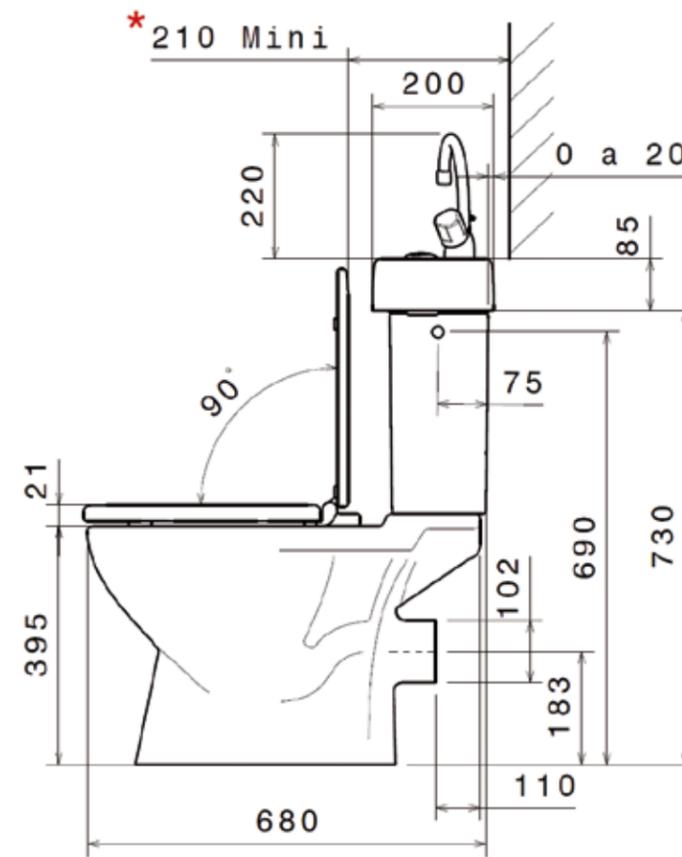

Measure the distance from the wall behind the WC seat in raised, vertical position: 210 mm minimum. (*cf drawing).

Width \ Length	120	125	130	135	140	145	150	155	160	165	170	175	180	185	190	195	200	205 +	
340	Green																		
345	Green																		
350	Green																		
355	Green																		
360	Green																		
365	Green																		
370	Green																		
375	Green

420	Green																		
425	Green																		
430	Green																		
435	Green																		
440	Green																		
445	Green																		
450	Green																		

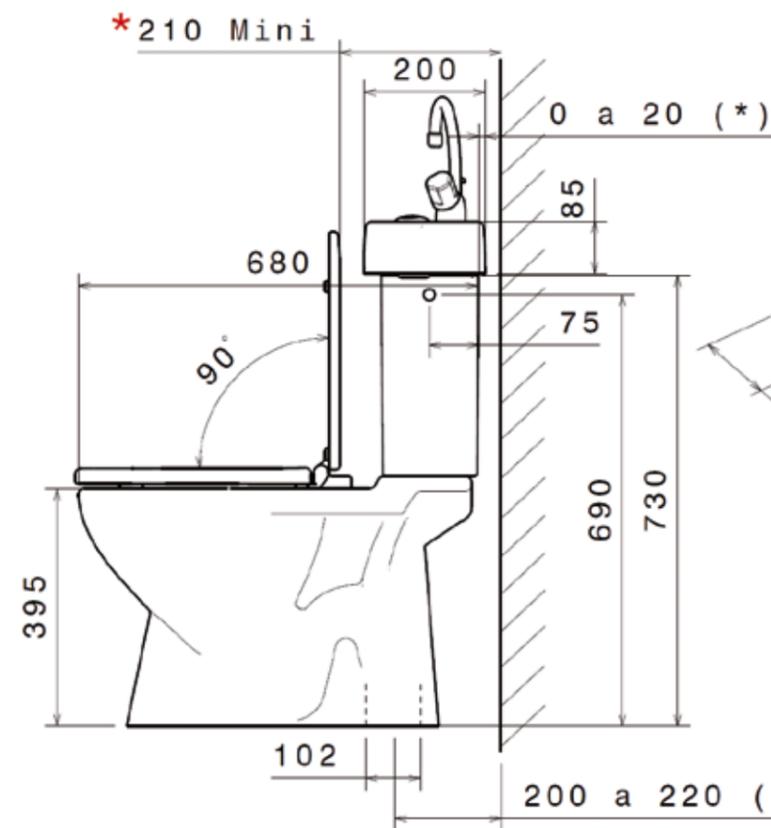

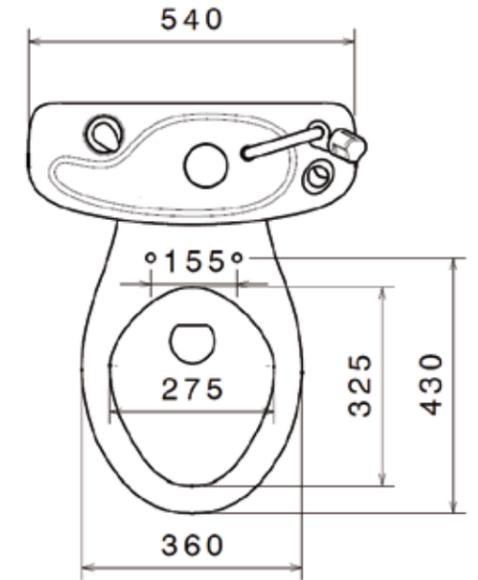

Area 1 = Adaptability OK.

Area 2 = Adaptability depending on the frontal curve of the cistern (this should more or less follow the curve of the basin).

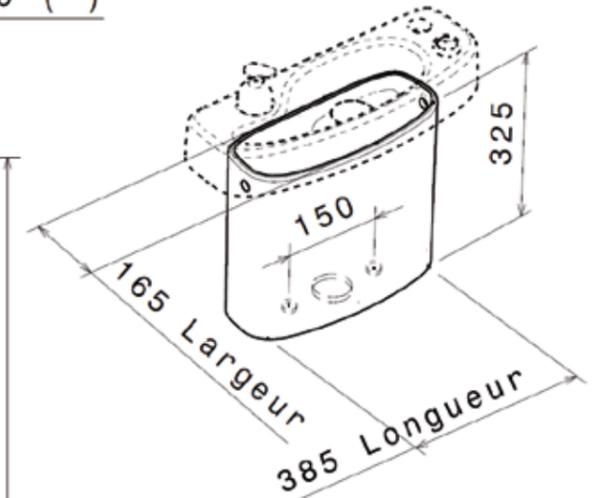

Area 3 = Adaptability unsuitable: the cistern must be replaced by a smaller model (refer to options). You could envisage using WiCi Mini which fits perfectly with a larger cistern.

Dimensions with horizontal WC outlet

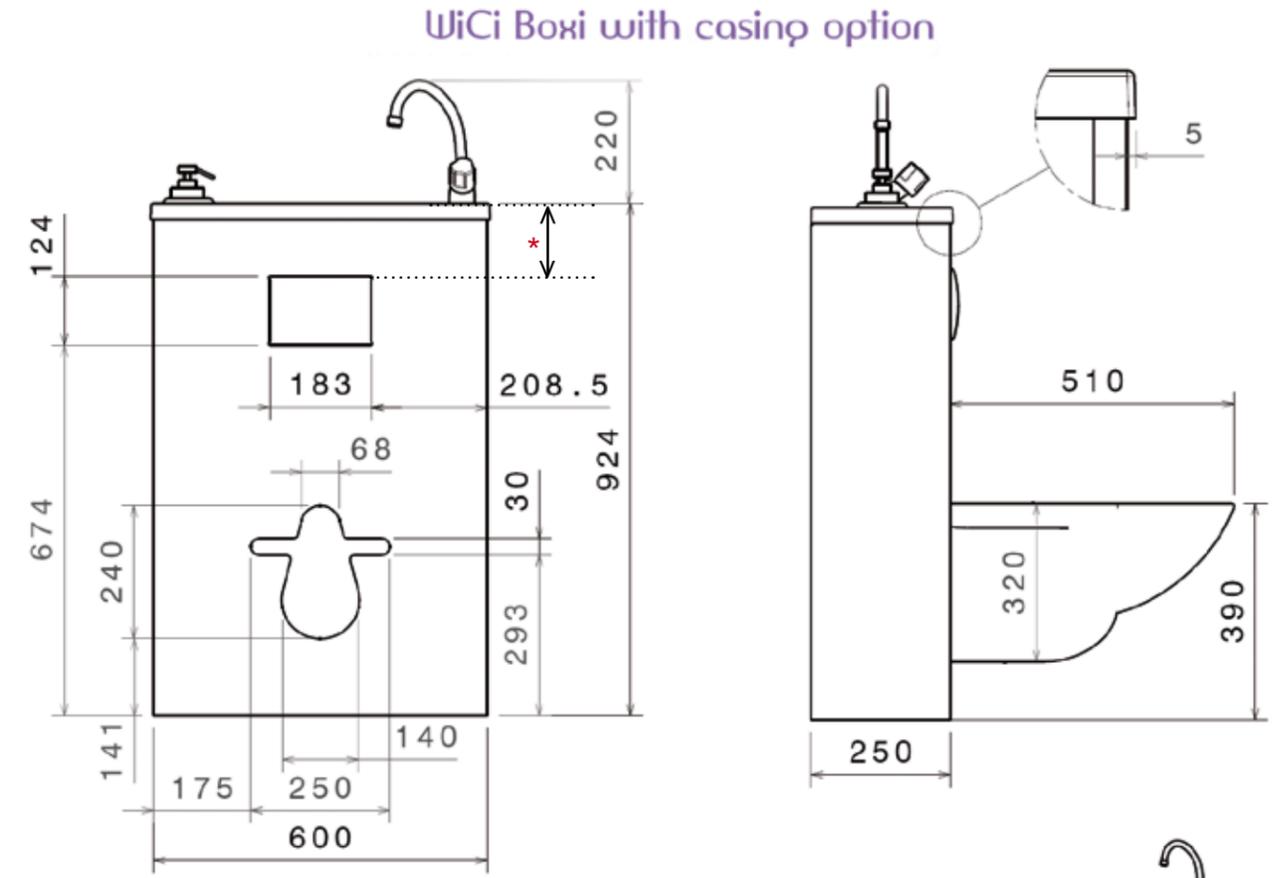

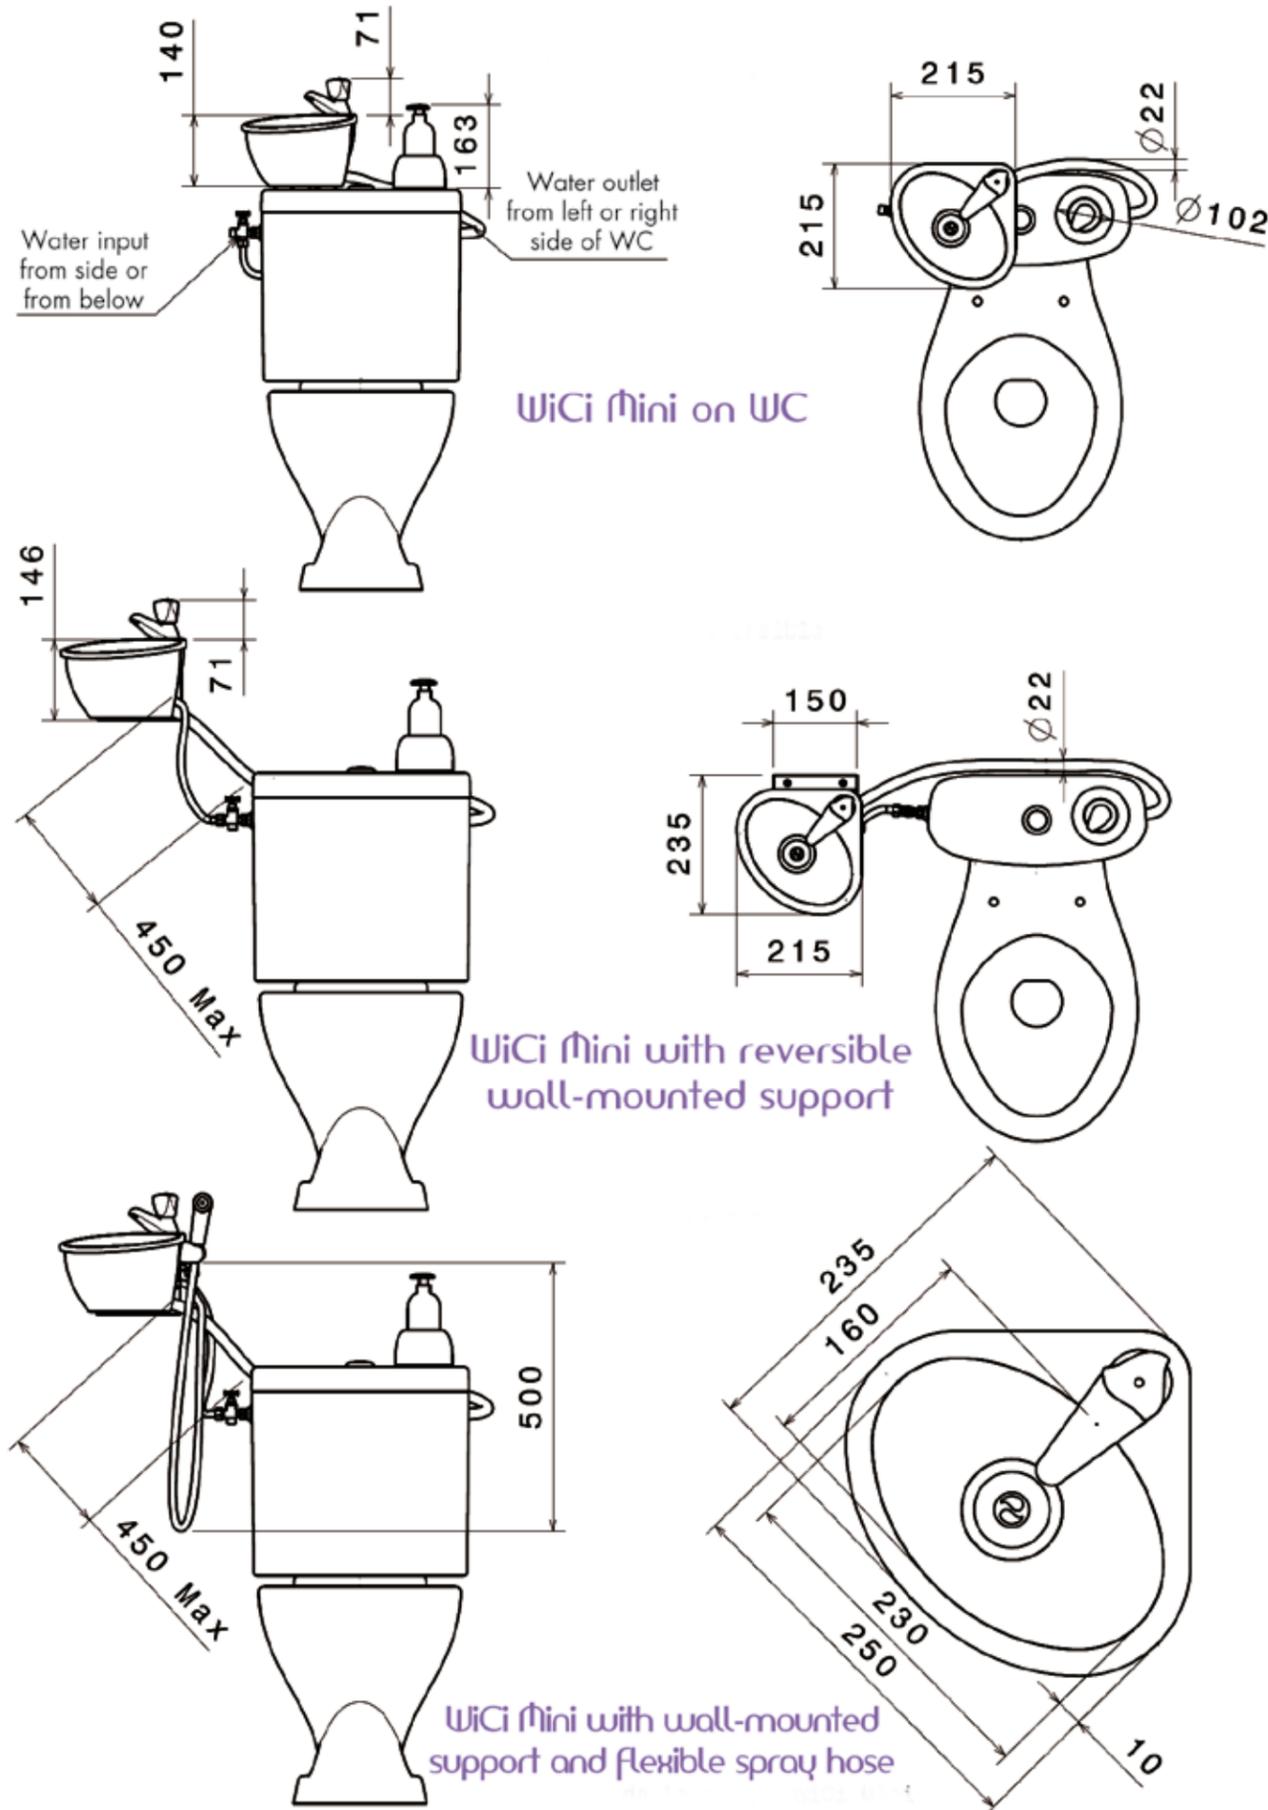

Dimensions with vertical WC outlet

! Notes :

- The WC water inlet can be installed either on the left or on the right hand side: this should be specified on the order form.
- For technical reasons, you are strongly advised not to mount the kit on plastic cisterns.
- Dimensions supplied for WCs are likely to vary as much as 5 mm due to the ceramic manufacturing process.

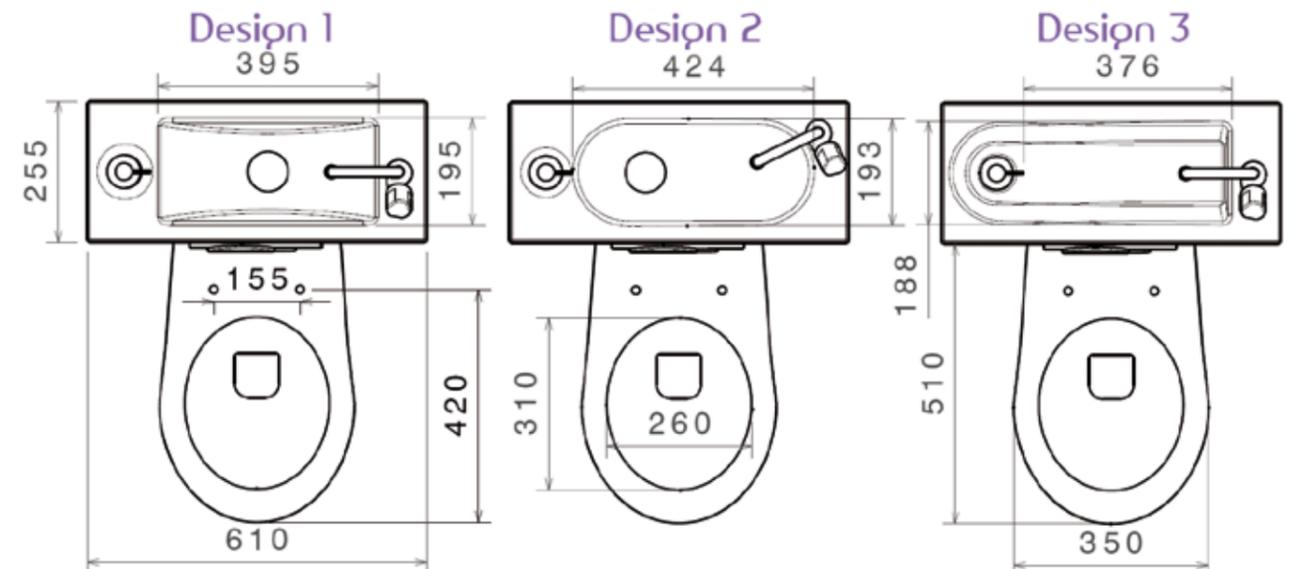

Technical specifications

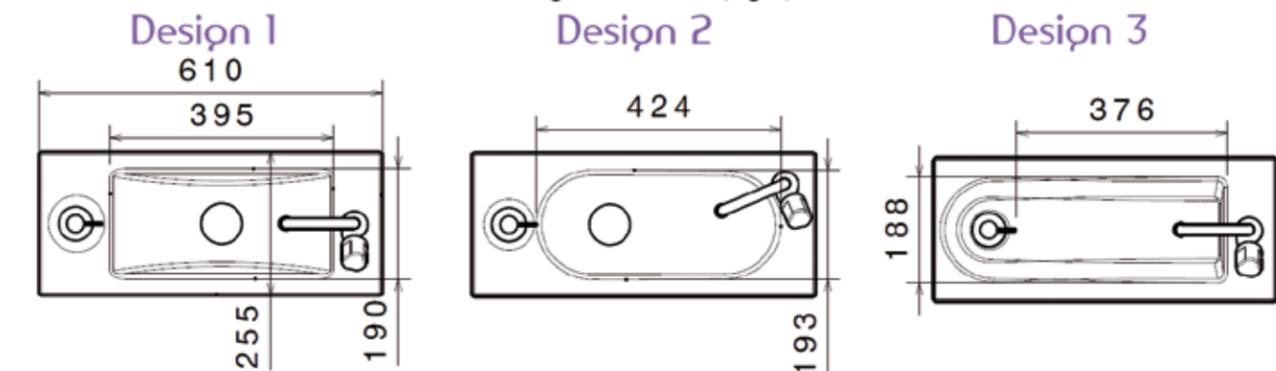

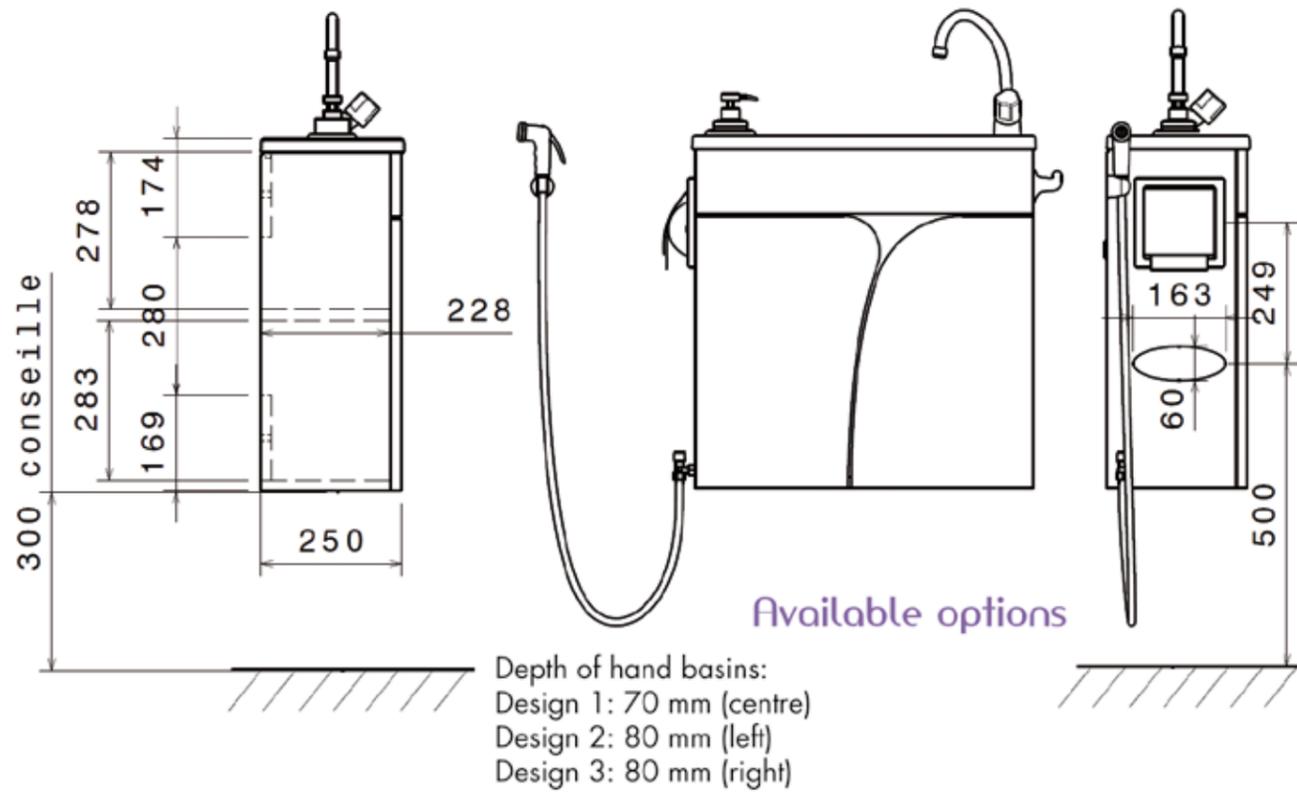

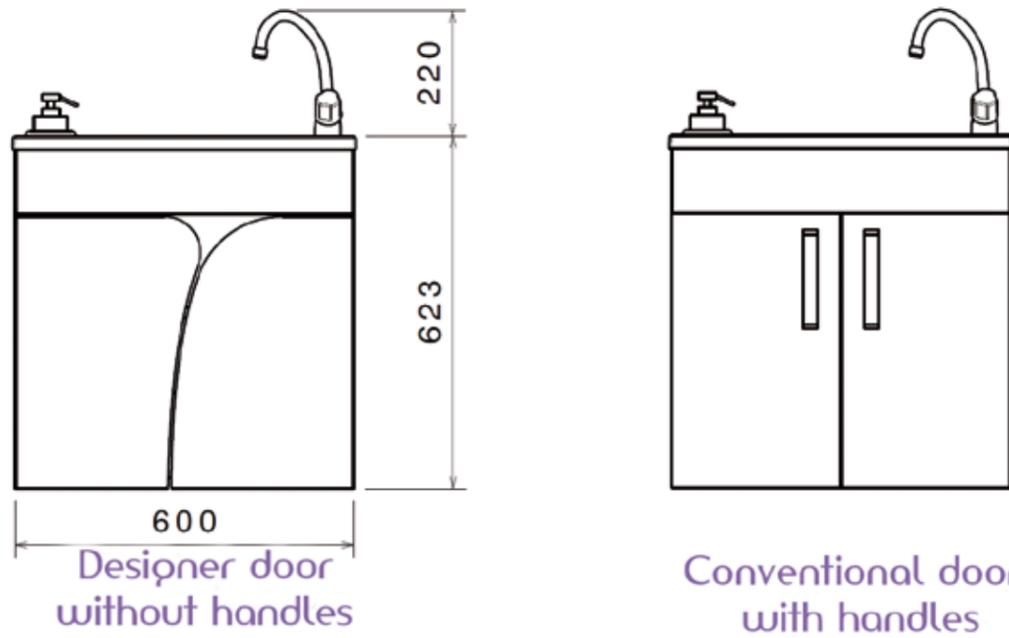

*Required distance between the top surface of the Boxi support and the top surface of the basin: 11cm

Wall to wall housing: please contact us

Depth of hand basins:
 Design 1: 70 mm (centre)
 Design 2: 80 mm (left)
 Design 3: 80 mm (right)
